

1     ABSTRACT OF THE DISCLOSURE

          A method of controlling a network, which  
includes network elements connected via links and  
provides services, includes the steps of creating view-  
5     configuration information based on network-  
configuration information with respect to each of the  
services such that the view-configuration information  
is related to the network-configuration information,  
and displaying a view based on the view-configuration  
10    information with respect to each of the services, the  
view including both or either one of a physical network  
configuration of the network and a logical network  
configuration of the network.
